

INSTRUCTIONS FOR No. 3464 OPERATING BOX CAR

Figure 1—No. 3464 Box Car Positioned for Opening Door

To open the couplers or the door of the No. 3464 Box Car a special Remote Control Section of track is required. The Remote Control Section used with "O" gauge track is the UCS; the section matching "027" track is No. 6019. One of these sections is included with every Lionel train set. To permit operation in various places in the layout additional sections can be purchased from your dealer.

Note: This car cannot be operated by the old RCS and No. 1019 Remote Control Sections which have no central electromagnets.

HOW TO OPERATE THE CAR

To open the door and make the crewman appear, position the plunger in the bottom of the car directly over the track electromagnet (See Figure 1). Then press the "Uncouple" button. Once opened, the door does not close automatically. Slide the door shut by hand to move the man back into the car and to reset the mechanism.

HOW TO COUPLE AND UNCOUPLE THE CAR

To uncouple cars the front wheels of either truck must be directly above the electromagnet. (See Figure 2). Pressing the "Uncouple" button will pull down the iron armature plate under the truck and allow the coupler to snap open. To couple cars simply push them together. Only one of the mating couplers has to be open for the cars to couple. If both are closed, move the car to the Remote Control Section and push the "Uncouple" button.

SERVICE INFORMATION

This car was thoroughly inspected at the Factory and is in perfect operating condition. Like all Lionel products this car is guaranteed against faulty material and workmanship to the extent that if any such defective car is returned to the Lionel Factory Service Department or any of Lionel Authorized Service Stations within one year of the date of purchase it will be repaired or replaced. If in the future it should ever require servicing, you may either send it to the Factory Service Department, or take it to your nearest Lionel Authorized Service Station. Your dealer can tell you the name and address of the Approved Service Man in your neighborhood.

If you decide to mail the car to us, be sure to pack it carefully to avoid damage in transit. Use the original box if possible and enclose in another strong container. A letter in a stamped envelope stating fully the service desired must be pasted to the outside wrapper, since postal regulations do not permit a letter or any written message to be placed inside the package.
