

Modeler's Forum

25 June 2026

Seven in attendance (Bob Wright taking notes, Jamie Robinson taking photos).

Bob Willard – Was searching the internet and found a photo of a truck he is scratch building. Presented a half cab “O” scale truck in progress.

Steve Doughty – He is busy working on his Square Foot entry for November. He brought in two water modeling products from JTT (#97614 and 95290) from a past request at a Modeler's Forum. Modge Podge is used by others, acrylic gloss medium also.

Jamie Robinson – Described his history in the past with airbrushes. He has bought a “no clean” non-internal mix airbrush from DSPIAE.com. He used it to paint an “O” scale inexpensive Atlas boxcar after removing the roof walk and other modifications. Comments on his work included that it looked like it had been molded in that color.

Kent Waterson – His White River Junction Depot is progressing. He showed off a test roof he has been working on for the flat roof part of the building. The sloped roof portion will get the verdigris treatment like the cupola has.

Dick Holman – Brought in photos of work he has done for customers in HO scale. He also had photos of foam work (hills/mountains) he has constructed with his other model train club.

John McMullen – Has completed his Square Foot entry for November. He has ordered Bar Mills Figures for a very good price and was watching loads of videos of depots.

GREAT FALLS MODEL RAILROAD CLUB
